PLANNING DEPT.  
COUNTY OF HAWAII

Mrs. Virginia Goldstein,  
County Planning Department  
25 Aupuni Street  
Hilo, Hawai'i 96720

The South Kohala Traffic Safety Committee has taken a position on Parker Ranch's proposed amendments to *Ordinance 92-65, Section 3, Conditions of Zoning*.

We are generally in favor of Parker Ranch's town center plan. Our first priority is that the Connector Road be built as soon as possible. We recommend that Parker Ranch pursue other funding alternatives through County, State and Federal entities to accelerate the Connector Road's construction in its entirety. We support the completion of smaller segments of roadway that provide intermediate looping systems that would allow options other than using the Mamalahoa Highway/Lindsey Road intersection.

Our considerations are:

1. *We support the general concept of Parker Ranch's current 2020 Plan.*
2. *We want the Connector Road as soon as possible, and Parker Ranch should work with other entities to fund it.*
3. *We want the establishment of the State Bypass as soon as possible.*
4. *The completion of the Connector Road should not be tied to the State Bypass.*

We hope that the Planning Department will take our considerations into account.

Sincerely yours,

Llewellyn Kumalae, Chairman
